DARA SPANDANA REDDY

Boston, MA-02119 | 857-396-3415 | dara.s@northeastern.edu | LinkedIn | GitHub

EDUCATION

Northeastern University, Khoury College of Computer Sciences | Boston, MA **Expected graduation: Dec 2024**

Master of Science, Computer Science

Related Courses: Programming Design Paradigm, Database Management Systems.

VNR Vignana Jyothi Institute of Engineering and Technology | India **Aug 2016 - Sep 2020**

Bachelor of Technology, Electronics and Communication Engineering GPA: 9.24/10.0

Related Courses: Computer Programming, Data Structures, Object Oriented Programming through Java,Computer Organization, Relational Database Management Systems and Computer Networks.

TECHNICAL SKILLS

Programming Languages: Java, Python, JavaScript, C, C++, SQL

Web Technologies: HTML, CSS, Bootstrap, React, Servlets, JSPs

Frameworks: Spring MVC, Spring Boot, REST APIs, Angular, jQuery, Junit

Other: SAP Hybris, AWS (EC2, S3, IAM), Linux, Git, Jira, Bitbucket, SonarQube, Postman, PIT, Putty, CI/CD pipelines, Docker, IntelliJ, Eclipse.

PROFESSIONAL EXPERIENCE

SAP Hybris Developer | Deloitte | Full-time | India **Jan 2021 – Dec 2022**

- Collaborated with 8-person team to build a B2C e-commerce solution for a client in the USA to sell products online with multiple payment options. Worked on Data Modeling, Cron jobs, Impexes, WCMS, Flexisearch queries, Smartedit, Backoffice, Web services using REST and third- party integrations with ECC, Versatile.
- Developed new Language Restriction for components to prevent creating additional pages with duplicate content.
- Revitalized the performance of link generator redirects which made the redirects faster at least by 10sec.
- Designed a groovy script to update missing data in production site for around 10,00,000 records.
- Improved the customer experience by enhancing functionalities in My Account page, Orders page and in Cart and Checkout flows. Undertook code refactoring tasks, resolved sonar issues, code smells and improved code coverage by writing JUNITs and mutation coverage using PIT.
- Created CI/CD pipelines to deploy and test code in testing environment.
- Coordinated in different phases of the product delivery (Analysis, Development, Dev Testing, SIT and UAT bug fixes, Documentation) under Agile software development lifecycle.

Electronics Corporation of India Limited | Intern | India **May 2018 – June 2018**

- Designed a microcontroller-based project that automatically turns on or off lights in a room by detecting the human movement.
- Implemented this project using 8051 microcontroller, two infrared sensors and Embedded C Programming. This circuit turns on the light when someone enters the room and turn off the light when the last person leaves the room.

ACADEMIC PROJECTS

Facial Emotion Recognition System using Convolutional Neural Networks

- Developed a model that could categorize outward appearances into one of seven emotions from image as well as video input using four-layer CNN framework.
- The Facial Expression dataset FER-2013 was utilized. This dataset contained 35,887 pictures having the basic articulations, for example, Happy, Sad, Angry, Disgusted, Fearful, Surprised and Neutral.

Blood Bank Management System

- Built a responsive web application where a student or a professor at my college could add their details so as to ease the process of finding blood when needed.
- Designed UI with front-end technologies HTML and CSS, backend with Spring MVC and MySQL Server for data storage.

PUBLICATIONS AND CERTIFICATIONS

- Published a research paper on “Facial Emotion Recognition using Convolutional Neural Networks”.
- AWS Certified Cloud Practitioner.
- Certified in Python Programming by InfyTq.
- Introduction to Machine Learning through Udemy.

ACHIEVEMENTS & INVOLVEMENTS

- Was awarded ‘Applause award’ by Deloitte for my valuable contribution to critical projects.
- Secured first position for presenting a paper on ‘Project Loon’ during technical fest at VNR VJIET.
- Participated in the 14th National Chess Championship for Women in India.
